

1st Annual Girls IN2 STEM Conference

Influence Her. Educate Her. Empower Her.

SATURDAY, JANUARY 25, 2020

10:00 AM - 2:00 PM

**ILLINOIS MATHEMATICS AND SCIENCE ACADEMY
1500 SULLIVAN ROAD, AURORA, IL**

GIS is a peer-to-peer mentoring program for youth who wish to learn about women's historical contributions and innovations towards science, technology, engineering and math and who wish to ignite their passion for a STEM career. We recognize that women remain underrepresented in the STEM workforce and we value having mentors, role models and champions to close this gap by empowering tomorrow's female leaders today. Our conference honors equity and inclusion and welcomes all who wish to attend.

KEYNOTE SPEAKER

Jacqueline Camacho-Ruiz

An award-winning entrepreneur, international speaker, philanthropist and author of 16 books. She is the founder of The Fig Factor Foundation and will present her message "Unleashing the Amazing through Mentorship" to the conference.
