Ask a Scientist

What does a scientist do? Find archived Skype sessions with scientists. Ask scientists questions for future Skype sessions. [MEET SCIENTIST](#)

Pollination

Now that it is spring, lots of insects can be seen. Some insects are harmful to plants, and others are helpful. How do bees, butterflies, beetles, ants and so many more insects help plants grow?

Use this lesson a guide to design and test your insect. Flour, sugar, and baby powder can simulate pollen. Use household materials to build the insect model.
