

# Celiac Disease

These genes cause celiac

Hello, I'm DQ8

And I'm DQ2

And treat gluten as a foreign substance

We tell the body gluten is dangerous triggering an immune response

Those who do, can't eat food with gluten

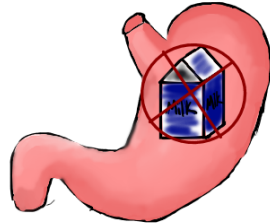

Doing so would cause intestine damage

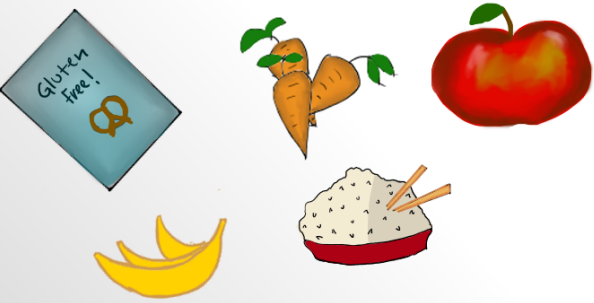

I don't feel so good

leading to many symptoms

<p>Acne</p> 	<p>Joint Pain</p> 	<p>Nausea</p> 	<p>Malnutrition</p>  <p>I'm hungry, where is my food?</p>	<p>Abdominal Pain</p> 	<p>Lactose Intolerance</p> 
---	---	---	---	---	--

Treatment includes a gluten free diet

And medication if necessary

There is no cure so people with celiac must take caution every day and read labels on the food they eat
