V2 More Visuals!

"Visualization is daydreaming with a purpose."

- Bo Benneett

Introduction

The second module will serve to advance the students' skills of data visualization.

Objectives

1. Students will learn Python via Colab

Agenda

1. Learn Python
2. Practice

Activities

Learn Python (60 minutes)

Purpose:

Provide students with the instructions needed to use Python.

Materials:

Computer

Instructions [Document](#)

[Tutorial](#)

Directions:

- Walk students through the instructions document.
- Give them the tutorial to follow.
- Have them try making their own graphs with the default dataset or one of their choice from Kaggle.
