

Unroll The Tale Of The Tape

Janice Krouse and Richard Stalmack
Illinois Mathematics and Science Academy
February 27, 2015
krouse@imsa.edu, rstalma@imsa.edu

What we hope to accomplish

1. Talk about mathematical modeling.
2. Use regression analysis to test our mathematical models.
3. Ask a question and make a guess as to the model we wish to apply
4. Perform an experiment.
5. Collect data.
6. Produce two competing mathematical models.
7. Decide which model is most appealing and which was successful and why it was successful.
8. Give some additional examples of investigation.
9. Talk about how to make it work in the classroom
10. Ask for suggestions from my fellow teachers.
