Graphic Design Internship, Summer 2020

et. The Project. The Project

The Carbondale Chamber of Commerce advances and advocates for business in the Carbondale area. This summer, I worked as a graphic design intern. There are constantly more events, and therefore there is a constant need for more graphics.

During the time of my internship, I was the only graphic designer for the chamber, meaning I filled almost all design needs.

ts. The Events. The Events.

For the most part, I made promotional graphics for a variety of events. This ranged from a summer golf scramble to an award recognition ceremony to a luncheon.

ss. The Process. The Process

I used Adobe Illustrator and Adobe Photoshop to create the designs needed for my internship. Most designs went through this process:

- Assignment (by mentor)
- Initial Design (by me)
- Commentss (by mentor)
- Revisions (by me)
