

Virtual Learning Design Sprint Outline

Criteria

Issue Identification

Make sure to clearly identify the issue given with a thorough description and applicable background information.

Issue Analysis

You should aim to thoroughly inquire about the issue. Make sure to identify underlying issues by finding root causes and how they impact the overarching issue. Include research to support claims and ideas presented here.

Solution

The solution should be comprehensive and address the issues you outlined in the previous criteria. How does your solution work? What resources does your solution use? Look for weak points and try to strengthen them.

Future Implications

A solution does not end with an idea. What will be the long-lasting effects of the solution? Will there be any risks? How can you evaluate the effectiveness of the solution past its implementation?

Presentation/Delivery

Be clear and coherent when presenting. Articulate yourself well. Make sure your group has good chemistry when presenting. If using an accompanying visual, try to make each slide appealing, useful, and concise. Don't forget to add citations for your sources.
